Wolfeboro, N. H., February 24, 1908.

Report of the Board of Health.

TO THE HONORABLE BOARD OF SELECTMEN OF THE TOWN
OF WOLFEBORO :

We herewith submit a report of the work done by the Board of Health during the year 1907.

Early in the year, the State Board of Health requested that samples of food products be collected for analysis. Samples of vinegar, molasses, sausage, etc., were submitted, and the results have been published in the "Sanitary Bulletin." In practical ly every case the samples conformed to the standards required.

The Rules for Sanitary Management of Barber Shops, promulgated by the State Board of Health have been provided.

The Regulations of the State Board of Health for the Protection of the purity of the waters of Lake Winnepesaukee and Lake Paugus, were posted in different parts of the town and published in the "Granite State News." They are as follows :

1. No sewerage from any town or village system of sewerage, or from any private sewer, or from any cottage, hotel, farmhouse, boarding-house, camp, or other abode, or from any privy, stable or outbuilding, shall be allowed to enter Lakes Winnepesaukee or Paugus.

2. Nothing from any closet or toilet room upon any boat or structure of any kind shall be allowed to enter Winnepesaukee Lake within one-half mile of any wharf or landing, or any public water intake.

3. Nothing from any closet or toilet room from any boat or structure of any kind shall be allowed to enter the waters of Lake Paugus.

4. No sewerage or drainage of any kind from any public building or buildings, and no animal or vegetable matter, or vehicle containing or having contained the same, and no deleterious matter of any kind shall be deposited in the waters of said lakes, or upon the banks of said lakes where it may contaminate the waters of the same.

5. Any town or city bordering upon the said lakes shall construct such sewerage systems as may be necessary to relieve

any village or congested sections so that the inhabitants thereof may comply with these regulations.

6. The local Boards of Health of towns and cities bordering on the shores of these lakes shall cause printed copies of these regulations to be posted conspicuously in different parts of the said towns and cities, and also cause them to be published in such newspapers as are issued in the said towns and cities bordering on said lakes, and they shall take such measures as may be deemed necessary to advise all owners or occupiers of estates, the drainage from which may enter said lakes, and all owners of boats upon said lakes, so that full notice of the provisions of these regulations shall be had by individuals and the public before the date on which they take effect.

7. It is the duty of the local Boards of Health of such towns and cities as border on the said lakes to enforce these regulations.

8. The foregoing regulations shall not in any manner affect the rules and regulations of the State Board of Health for the protection of the waters of Alton Bay promulgated July 17, 1906.

9. These regulations shall take effect and be in force on and after January 1, 1909.

During the Summer several complaints were made regarding odors from the "Back Bay." The matter was investigated, the decaying rubbish along the shores removed, and drainage re-established. Further trouble will surely result, if refuse is allowed to be left along the shore. A considerable amount of sewage flows into this small body of water; where, at best the drainage is inadequate, so no organic matter should be permitted to stay on the banks.

But two cases of typhoid fever were reported during the year. One case was brought from Massachusetts, the other developed in a farm house where the Sanitary conditions were very good. The patient in the latter case had been out of town and there is a strong possibility that the disease was contracted at that time.

Two cases of diphtheria were reported, one at Wolfeboro Falls, and one in the village. There was no mortality.

During July and August an Epidemic of Measles appeared. Thirty-seven cases were reported; no fatal case occurred. Nearly every case was traced to an undiagnosed case from Massachusetts.

The law regarding the vaccination of school children has been enforced as directed by the State Board.

Samples of Beech Pond Water have been submitted during the year. The report in each case has been very satisfactory.

The deaths from all causes were	32.
